Where to get GNOME news?

http://www.gnome.org

The screenshot shows the GNOME.org website in a web browser. The address bar displays 'https://www.gnome.org'. The page features the GNOME logo (a paw print) and the word 'GNOME' in a large, bold, sans-serif font. Below the logo is a navigation bar with links: 'GNOME 3', 'Technologies', 'About Us', 'Get Involved', and 'Foundation'. A search bar is located on the right side of the navigation bar. The main content area is divided into two columns. The left column contains a screenshot of the GNOME 3 desktop environment, showing a dark theme with a sidebar on the left, a top panel with a search bar, and several application windows. The right column has a heading 'GNOME 3: Ease, comfort and control' followed by a paragraph describing GNOME 3 as an easy and elegant way to use a computer. Below the paragraph are two buttons: 'Discover GNOME 3' and 'Get GNOME 3'. At the bottom of the page, there are two sections: 'Make a donation and become a Friend of GNOME!' and 'Get involved!'. The 'Make a donation' section includes a paragraph about the benefits of donating. The 'Get involved' section includes a paragraph about the GNOME Project community.

GNOME 3: Ease, comfort and control

GNOME 3 is an easy and elegant way to use your computer. It is designed to put you in control and bring freedom to everybody. GNOME 3 is developed by the GNOME community, a diverse, international group of contributors that is supported by an independent, non-profit foundation.

Discover GNOME 3 Get GNOME 3

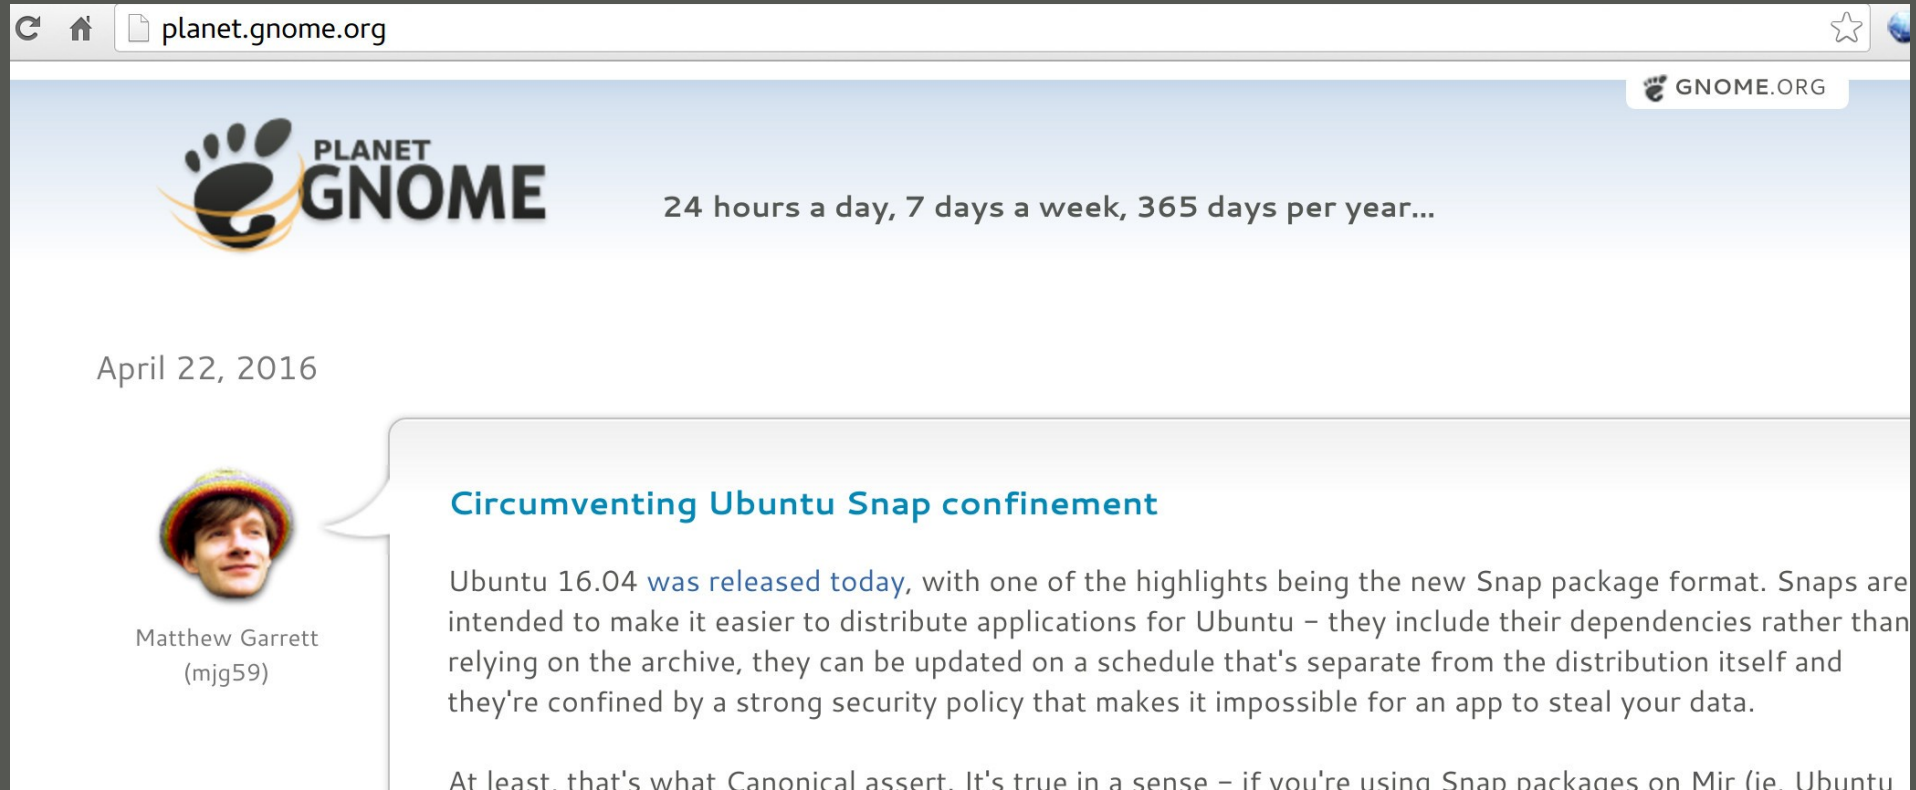

Make a donation and become a Friend of GNOME!

Your donation will ensure that GNOME continues to be a free and open source desktop by providing resources to developers, software and education for end users, and promotion for GNOME worldwide.

Get involved!

The GNOME Project is a diverse international community which involves hundreds of contributors, many of whom are volunteers. Anyone can contribute to the GNOME!

http://planet.gnome.org

The screenshot shows a web browser window with the address bar displaying "planet.gnome.org". The page header features the "PLANET GNOME" logo on the left and a "GNOME.ORG" link on the right. Below the header, the text "24 hours a day, 7 days a week, 365 days per year..." is displayed. The main content area shows a blog post dated "April 22, 2016" by "Matthew Garrett (mjg59)". The post title is "Circumventing Ubuntu Snap confinement". The text of the post discusses the release of Ubuntu 16.04 and the new Snap package format, noting that snaps are intended to make it easier to distribute applications for Ubuntu by including dependencies and being updated on a separate schedule. The post concludes with the sentence: "At least, that's what Canonical assert. It's true in a sense – if you're using Snap packages on Mir (ie. Ubuntu".

Circumventing Ubuntu Snap confinement

Ubuntu 16.04 [was released today](#), with one of the highlights being the new Snap package format. Snaps are intended to make it easier to distribute applications for Ubuntu – they include their dependencies rather than relying on the archive, they can be updated on a schedule that's separate from the distribution itself and they're confined by a strong security policy that makes it impossible for an app to steal your data.

At least, that's what Canonical assert. It's true in a sense – if you're using Snap packages on Mir (ie. Ubuntu

Help us make GNOME better by getting
involved today!
